Zollikofen, July 27, 2019

To whom it may concern,

It is my pleasure to deliver this letter of recommendation for Aleksandr Severyanov, who has worked as a contractor for developing macOS and iOS software for my company OnQ Systems GmbH. I got to know Aleksandr from an third-party iOS project we were both working on. When that assignment ended, I asked him if he was interested in redeveloping a financial software for macOS which I had created in 2004. Since joining forces in 2017, we have developed PayMaker macOS 2.x and successfully brought it to market. We have also updated CLX.Scan2Pay, which is an iOS companion app to PayMaker.

Aleksandr is a highly skilled macOS and iOS developer who delivers software of outstanding quality. If the requirements or specification are not fully clear or inconsistent, he asks for clarification or suggests improvements. He thoroughly tests his code before committing it. In the very few times that problems arose, he has delivered updates fast, even if the reason for the problem was obscure and hard to detect.

In conclusion, Aleksandr has my highest recommendation for any position related to software development on Apple platforms. His deep knowledge of the Apple development environments, his analytical expertise and his ability to work independently make him an ideal candidate for employment. Thank you very much for your time and feel free to get in touch with any questions whatsoever.

Sincerely,

Beat Koch
CEO OnQ Systems GmbH
